## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

- 1) control of coating by time measurement
- 2) control of coating by image analysis
- 3) control of coating by both time measurement and image analysis.

The species are independent or distinct because they are mutually exclusive. It is not possible to perform the methods of claims covered by specie 3 using solely the steps disclosed in the methods of claims covered by species 1 or 2. Further, it is not possible to perform the methods of claims covered by specie 1 using solely the steps disclosed in the methods of claims covered by specie 2, or vice versa.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 48-66 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
